SUMMARY

Backend Engineer at TCS with Strong algorithmic foundation (**Peak LeetCode Rating: 1799**) translated into real impact: **70%** fewer production incidents and **65%** faster SQL queries on microservices with Spring Boot at TCS.

EDUCATION

Chaudhary Charan Singh University

Bachelor of Technology - CGPA - 7.83

Computer Science

2020 - 2024

Meerut, U.P.

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML, JavaScript

Backend Technologies: Spring Boot, Spring AI, RAG, Spring Security, JWT, Redis, Hibernate, JPA, REST APIs

Tools & Platforms: MySQL, Postman, Eclipse, VS Code, STS

Core CS Skills: OOP, DBMS, Data Structures & Algorithms, Transactions, Concurrency, System Design Basics

Cloud & DevOps: Docker, Git, Jenkins

Familiar with: OAuth 2.0, ReactJs, LLM's

Experience

Tata Consultancy Services

Feb 2025 – Present

Backend Engineer

Noida

- Developed and optimized RESTful APIs using Spring Boot, enhancing service efficiency and system scalability.
- Improved database query performance by **65%** by restructuring SQL logic, indexing, and optimizing ORM.
- Implemented **transactional consistency mechanism** in backend services to maintain reliable data processing, leading to a **70% reduction in production incidents**.
- Reduced file retrieval latency by **40%** by implementing a **hash-based routing system**.
- Built a **RAG-powered internal support assistant using Spring AI**, reducing average document search time from 15 minutes to under 1 minute.

PROJECTS & CONTRIBUTIONS

Fault-Tolerant Rate Limiter 🔗 | Spring Boot, Redis, Docker

- Designed and implemented a production-grade rate limiting system using **Spring Boot, Redis, and Lua scripts** to ensure **atomic request evaluation, high concurrency safety, and configurable request thresholds**.
- Built **resilient and observable infrastructure** with **filter-based enforcement, fail-open behavior** during **Redis outages, Dockerized deployment, and custom Actuator metrics for real-time monitoring**.

Idempotent Transaction Engine (Double-Entry Ledger) 🔗 | Spring Boot, MySQL, Jakarta

- Designed an idempotent transaction engine guaranteeing **exactly-once transaction processing** using client-provided external transaction IDs.
- Implemented strict transaction state transitions(**INITIATED → PROCESSING → SUCCESS/FAILED**) to prevent invalid retries.
- Used pessimistic locking to ensure **balance correctness** under **concurrent transfers**.
- Built a double-entry ledger with **automated reconciliation and drift repair jobs**.
- Ensured financial consistency through **ledger verification and failure-safe rollbacks**.

INTERNSHIPS

SoftSkills Infotech Pvt. Ltd. 🔗 | Python Developer

- Implemented a digital marketing crawler using Pandas, Requests and JSON in Python.
- Contributed in a website login automation tool using Selenium in Python.

ACHIEVEMENTS

- Achieved a peak **LeetCode rating of 1,799** ranking in the **top 8.69% of 800k+ global participants**.
- Received **Special Initiative Award** at TCS.
- Received **Star Team Award** at TCS.
